Test Report — CMPT 353 Project 1

Channel-Based Programming Q&A Tool Testing method: Manual — browser + Docker

---

Setup

Before running any test:

```
docker-compose down -v          # wipe old DB
docker-compose up --build       # fresh build + seed
```

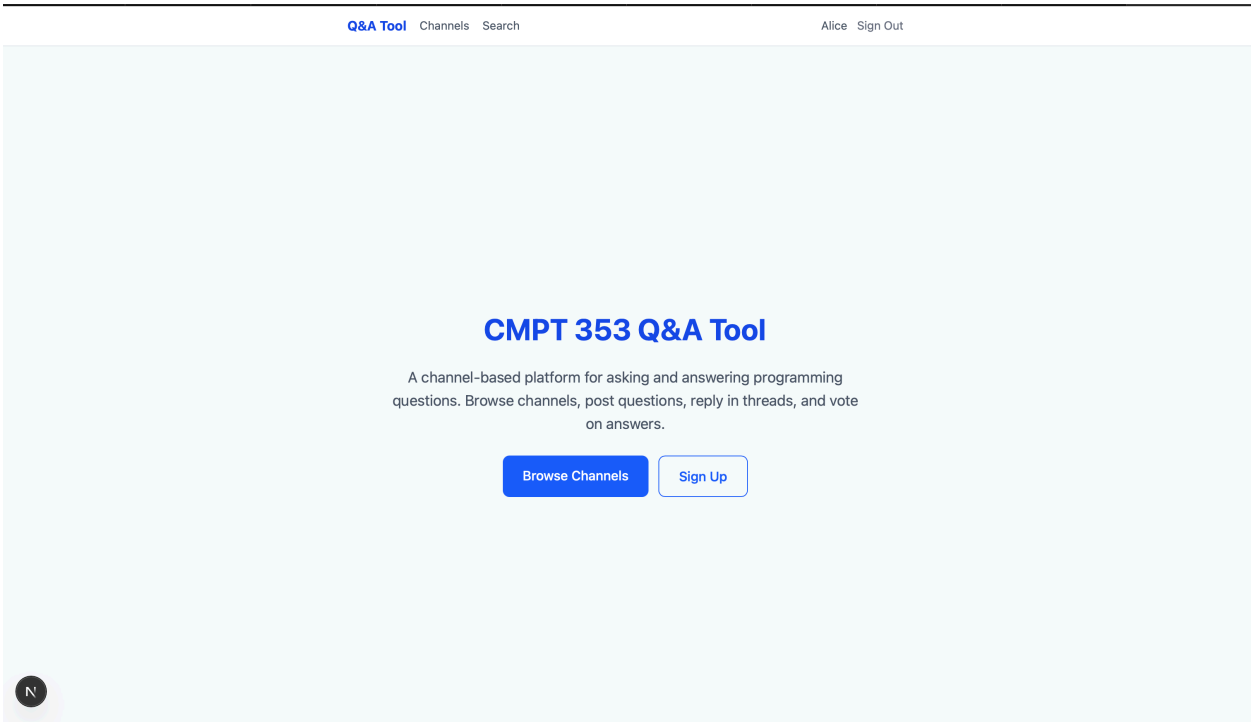
Open **http://localhost:3000** in a browser. Confirm `http://localhost:3000/api/health` returns `"status": "ok"`.

Test Cases

TC-01 — Landing page loads

Feature: Part 1 — Basic system
Steps: 1. Open `http://localhost:3000`

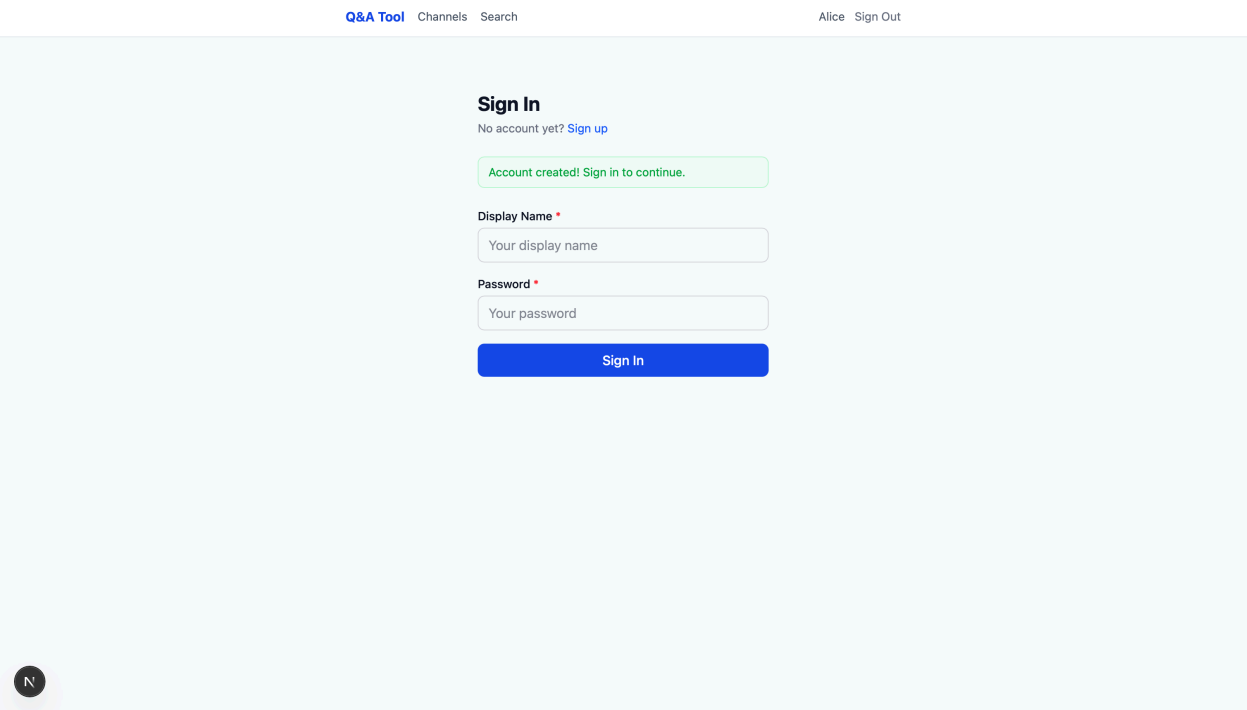
Expected: Page displays the app name, a short description, and a “Browse Channels” link.
Result: Pass
Screenshot:



TC-02 — Register a new account

Feature: Part 2 — Accounts
Steps: 1. Go to `http://localhost:3000/register` 2. Enter Display Name: `TestUser1` 3. Enter Password: `testpass1` 4. Enter Confirm Password: `testpass1` 5. Click **Sign Up**

Expected: Redirected to `/login` with a success message ("Account created").
Result: Pass
Screenshot:

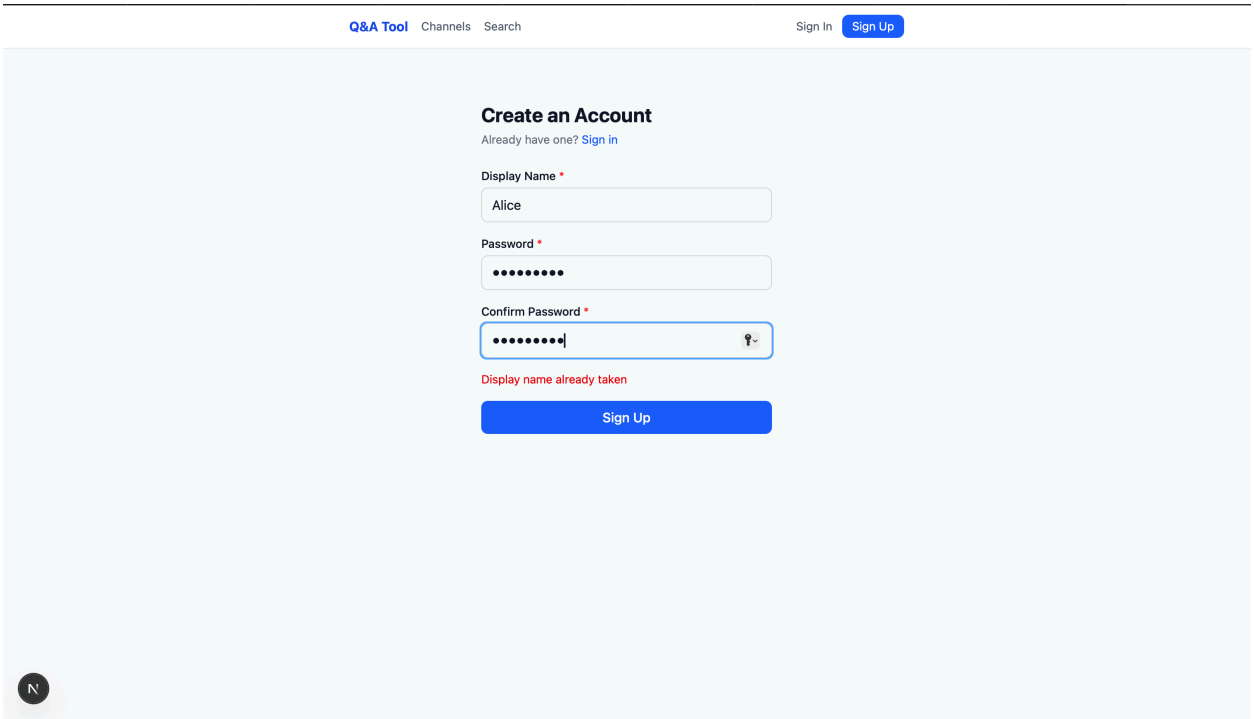


TC-03 — Register with duplicate display name is rejected

Feature: Part 2 — Input validation
Steps: 1. Go to `http://localhost:3000/register` 2. Enter Display Name: `Alice` (already seeded) 3. Enter Password: `anything123` 4. Enter Confirm Password: `anything123` 5. Click **Sign Up**

Expected: Error message shown: "Display name already taken". No redirect.
Result: Pass

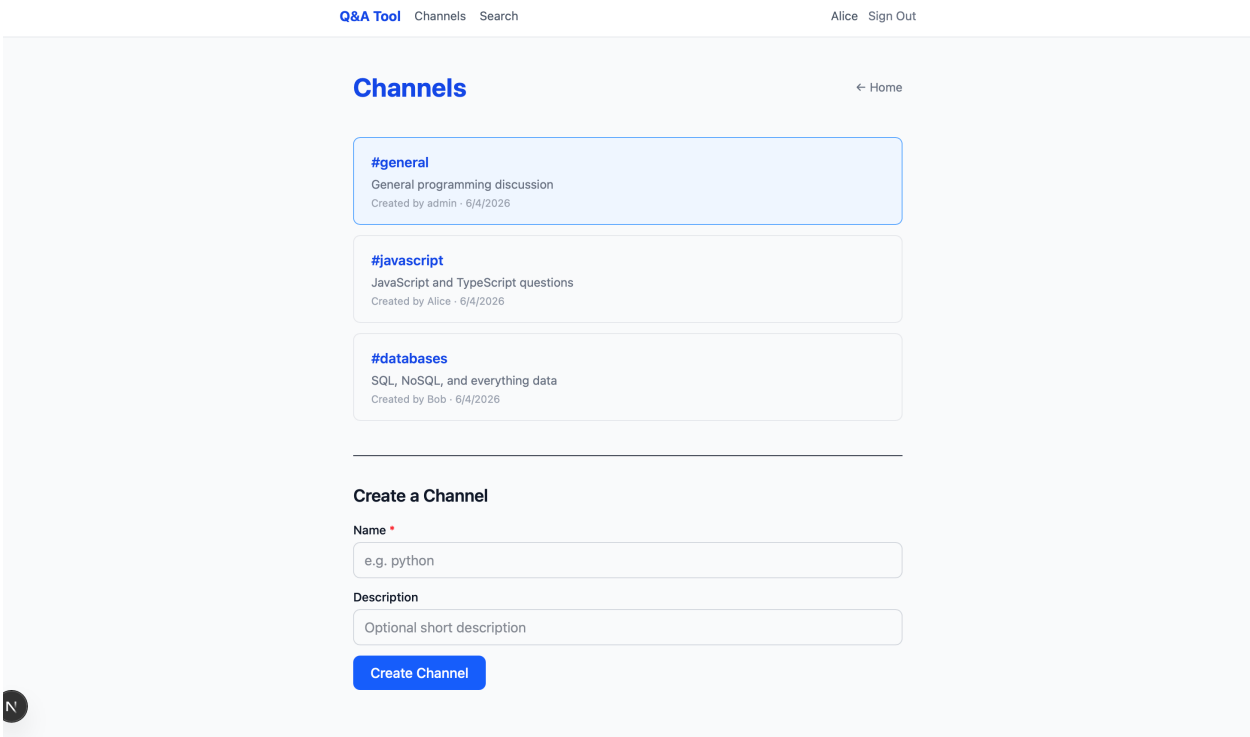
Screenshot:



TC-04 — Login with valid credentials (regular user)

Feature: Part 2 — Accounts
Steps: 1. Go to `http://localhost:3000/login` 2. Enter Display Name: `Alice` 3. Enter Password: `password123` 4. Click **Sign In**

Expected: Redirected to `/channels`. Navbar shows “Alice”.
Result: Pass
Screenshot:

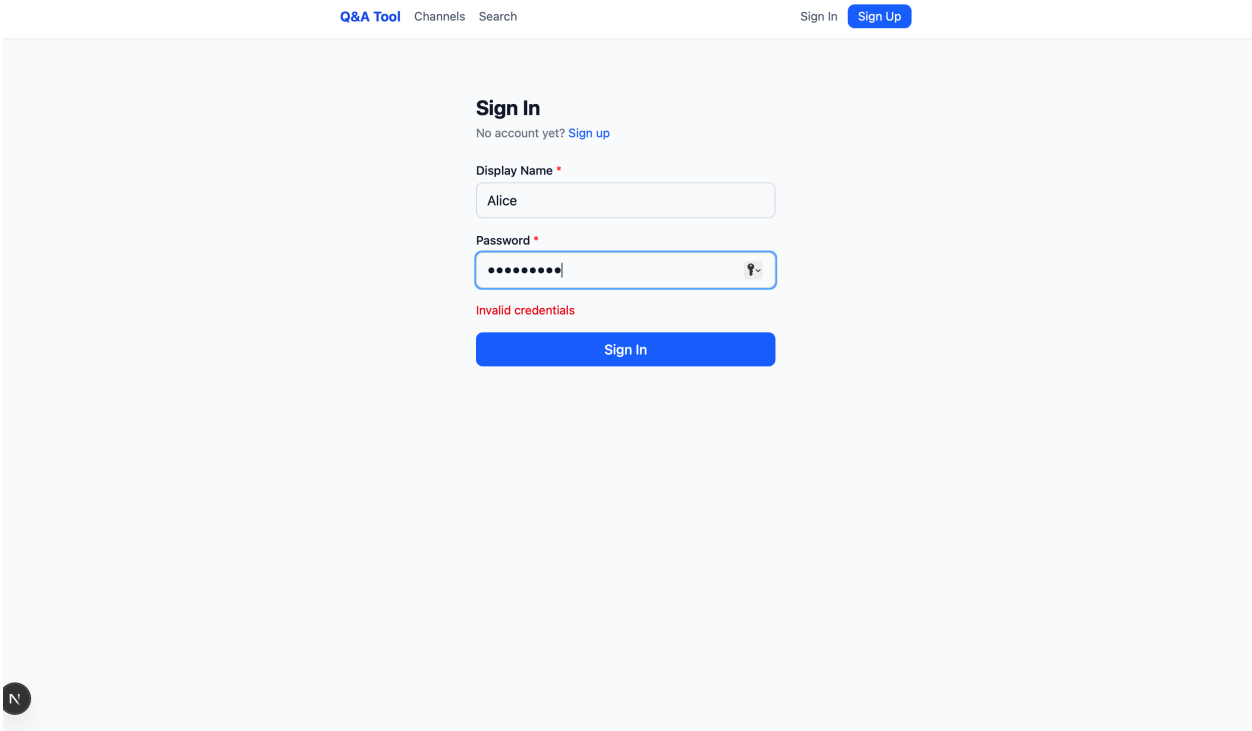


TC-05 — Login with wrong password is rejected

Feature: Part 2 — Security
Steps: 1. Go to `http://localhost:3000/login` 2. Enter Display Name: `Alice` 3. Enter Password: `wrongpassword` 4. Click **Sign In**

Expected: Error message: “Invalid credentials”. Stay on login page.
Result: Pass

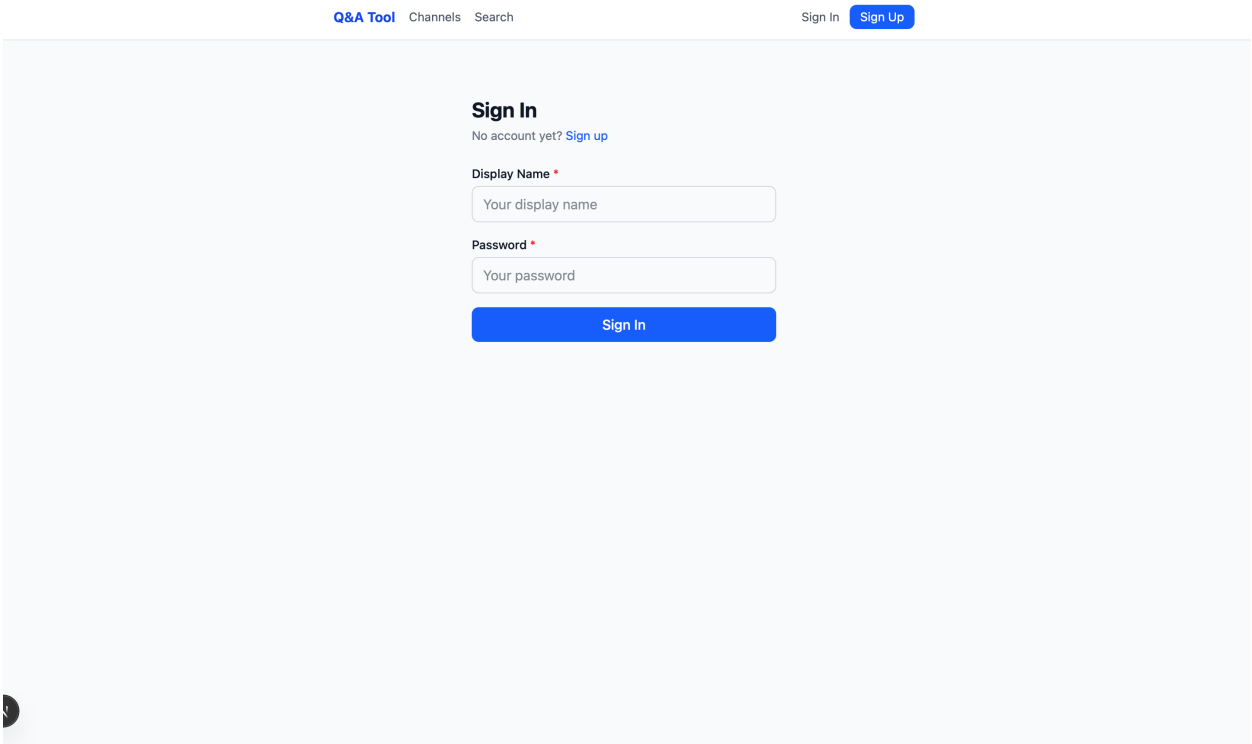
Screenshot:



TC-06 — Unauthenticated user cannot create a post (redirect enforced)

Feature: Part 2 — Auth enforcement
Steps: 1. Sign out (or open a fresh private/incognito window) 2. Navigate to `http://localhost:3000/channels/1/new-post`

Expected: Immediately redirected to `/login`.
Result: Pass
Screenshot:

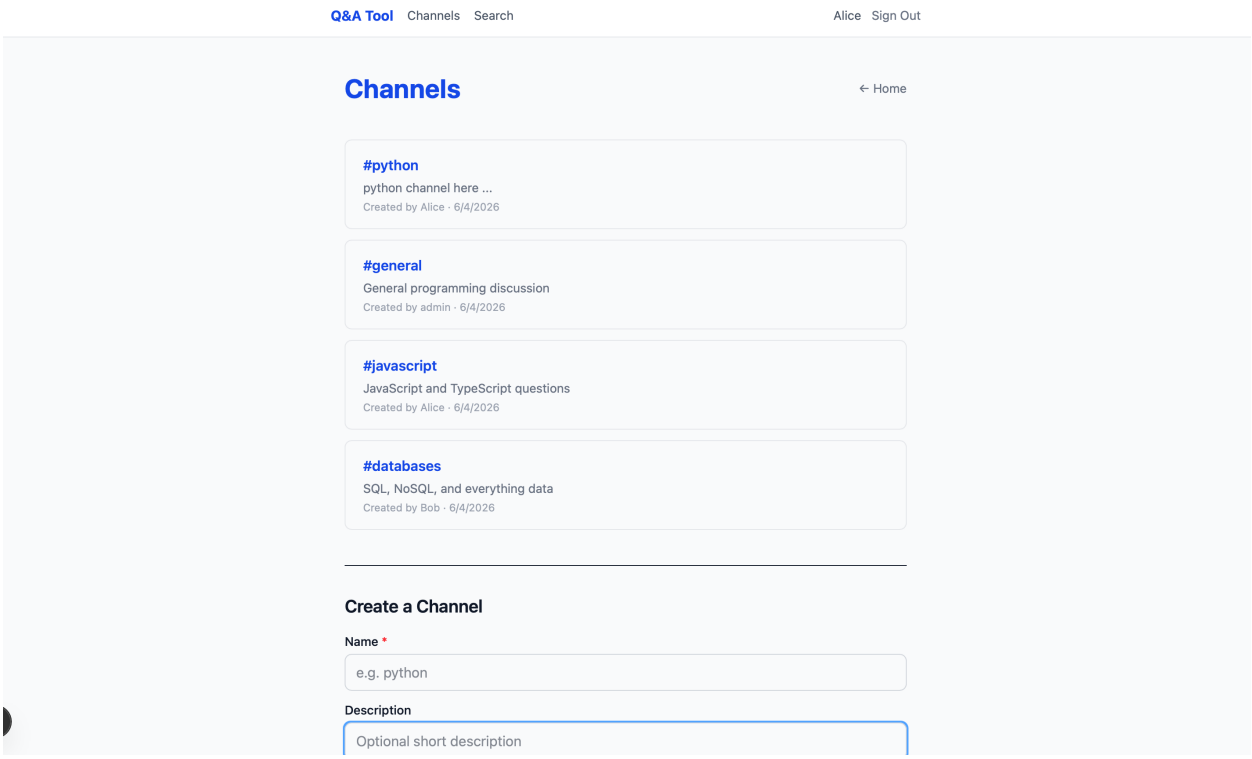


TC-07 — Authenticated user creates a channel

Feature: Part 1 — Channels
Steps: 1. Sign in as `Alice` / `password123` 2. Go to `http://localhost:3000/channels` 3. Fill in Channel Name: `python` 4. Fill in Description: `Python questions` 5. Click **Create Channel**

Expected: New “python” channel appears in the channel list.
Result: Pass

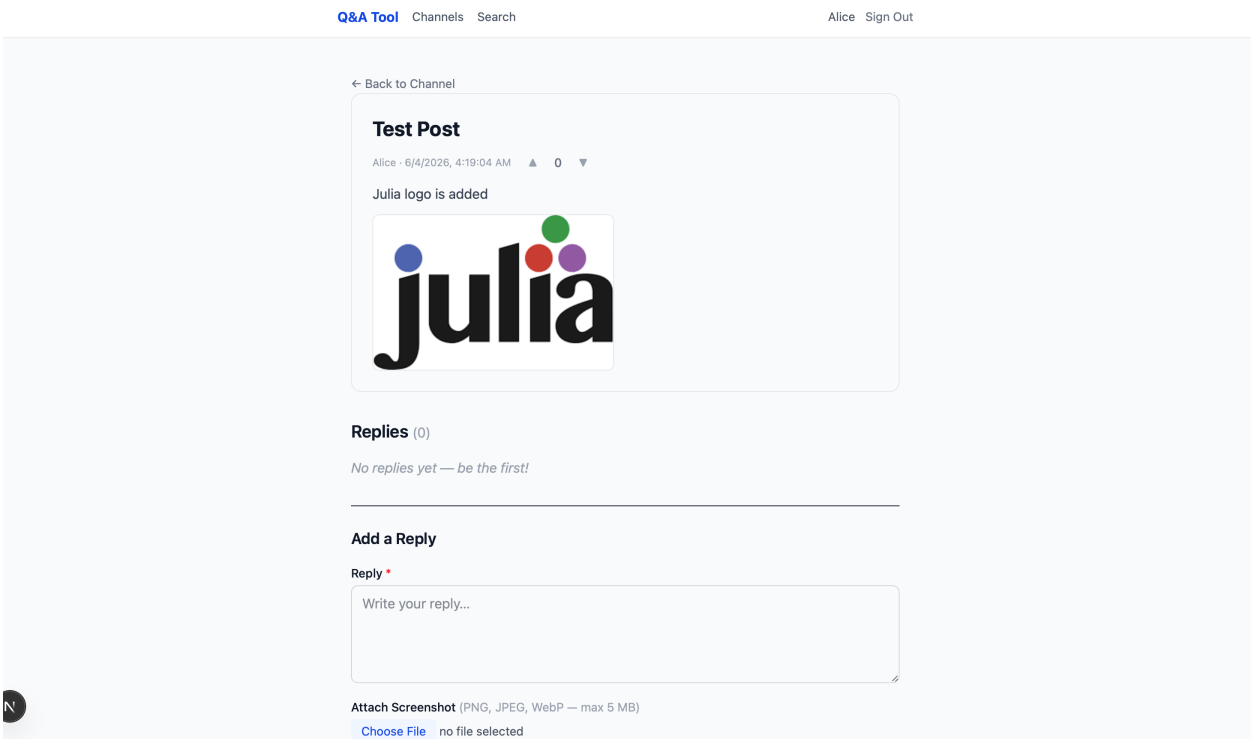
Screenshot:



TC-08 — Authenticated user creates a post with a screenshot attachment

Feature: Part 1 — Posts + uploads
Steps: 1. Sign in as `Alice` 2. Go to `http://localhost:3000/channels` → click any channel → "New Post" 3. Fill Title: `Test post with image` 4. Fill Body: `This post has an attached screenshot.` 5. Choose a `.png` or `.jpg` file (any small image from your computer) 6. Click **Post**

Expected: Redirected to the new post's page. The uploaded image is displayed below the post body.
Result: Pass
Screenshot:

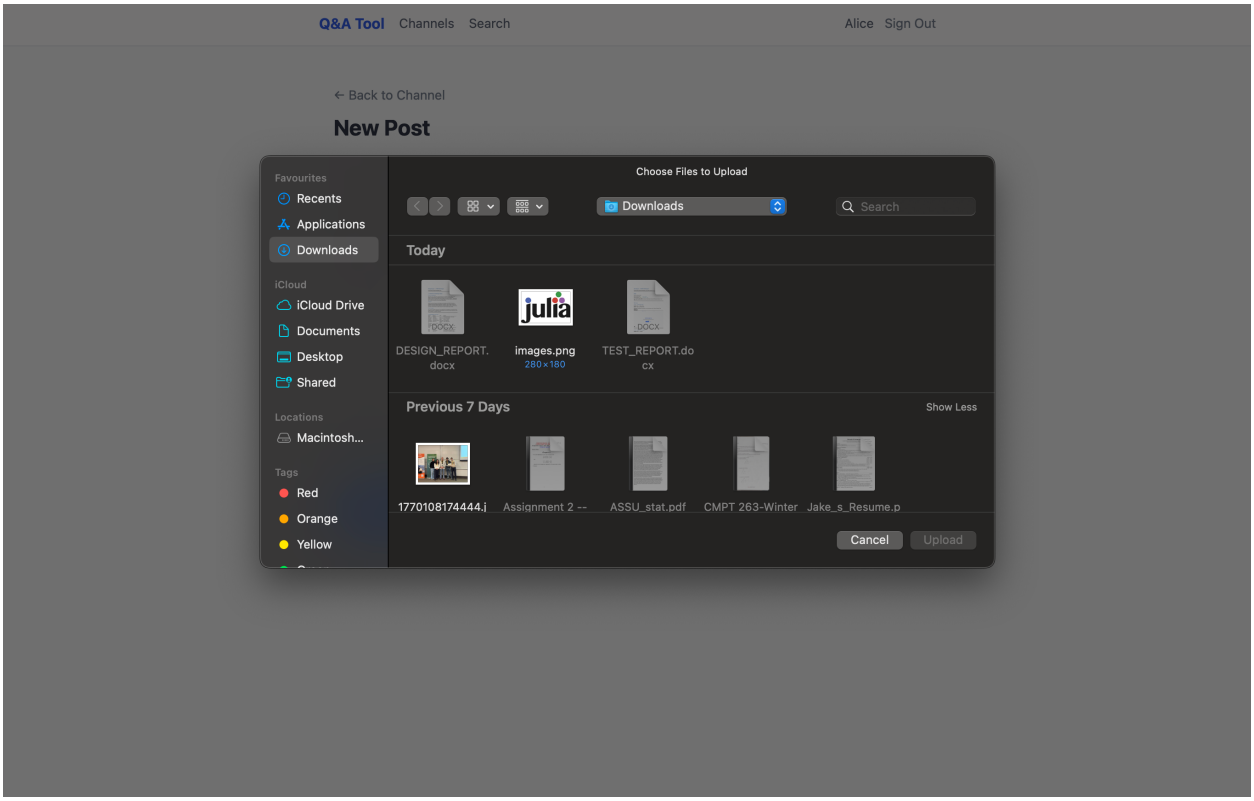


TC-09 — File upload rejects non-image file

Feature: Part 1 — Upload validation
Steps: 1. Sign in as `Alice` 2. Go to New Post form 3. In the file input, select a `.pdf` or `.txt` file

Expected: Inline error message: “Only PNG, JPEG, and WebP images are allowed”. Submit button is disabled.
Result: Pass

Screenshot:

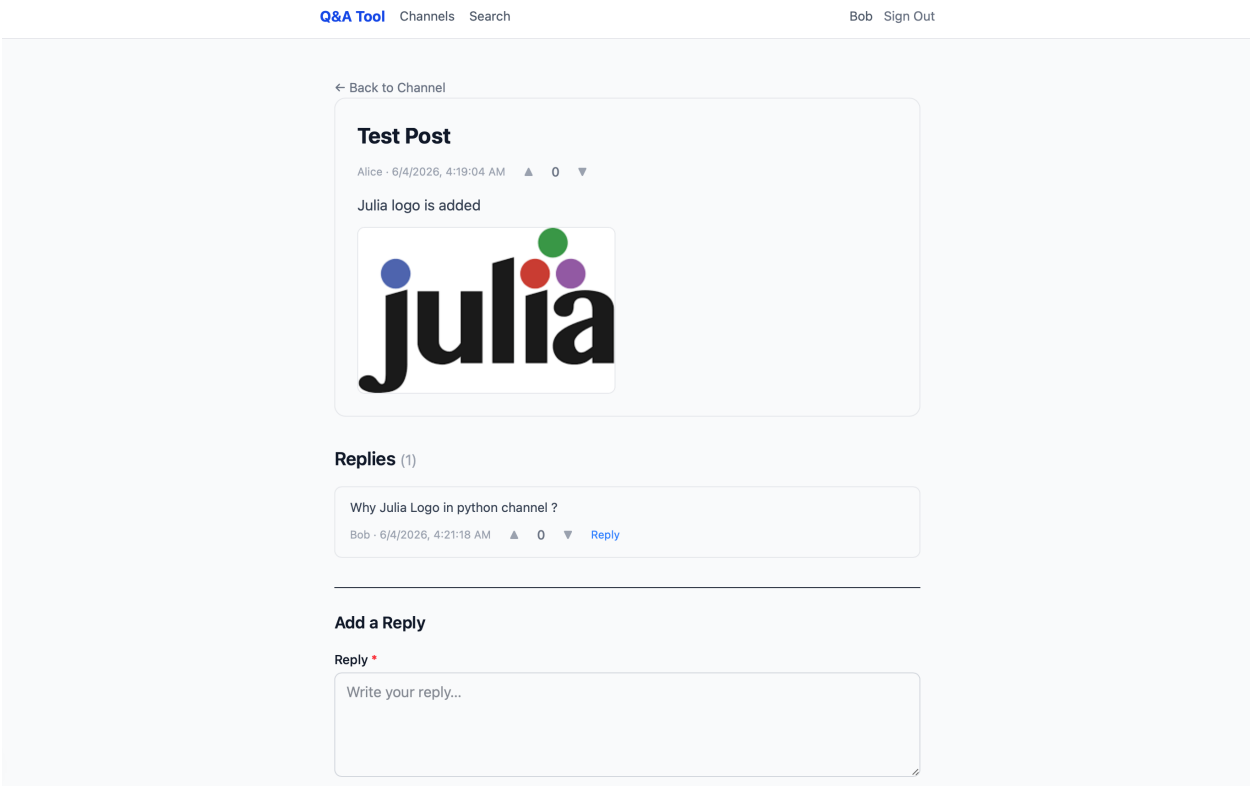


TC-10 — Reply to a post

Feature: Part 1 — Replies
Steps: 1. Sign in as `Bob` / `password123` 2. Navigate to any post (e.g. `http://localhost:3000/posts/2`) 3. Type a reply in the reply form 4. Click **Post Reply**

Expected: Reply appears in the replies section with Bob's display name.
Result: Pass

Screenshot:

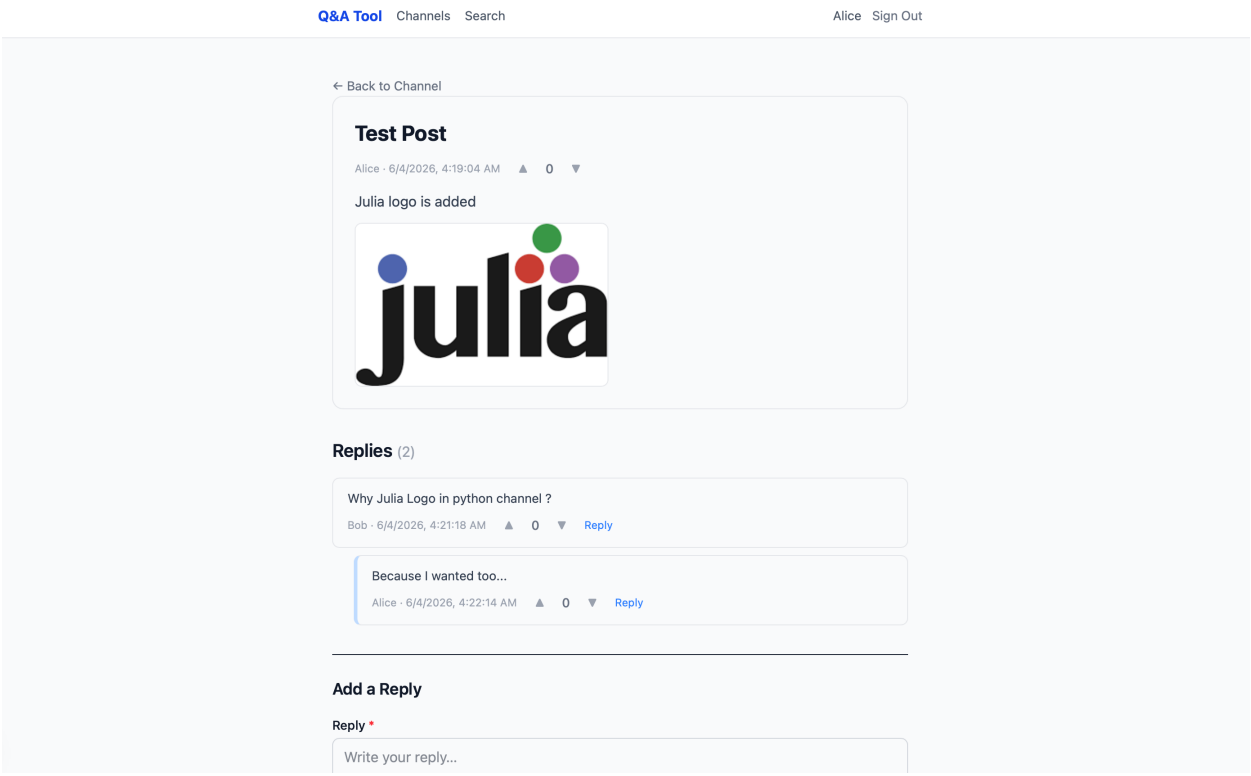


TC-11 — Nested reply (reply to a reply)

Feature: Part 3 — Threaded replies
Steps: 1. Sign in as `Alice` 2. Navigate to a post that has at least one reply 3. Click the **Reply** link on an existing reply (not the post-level form) 4. A "Replying to Bob" banner should appear above the form 5. Type a reply body and submit

Expected: The new reply appears indented under the reply it was targeted at (threaded view).
Result: Pass

Screenshot:

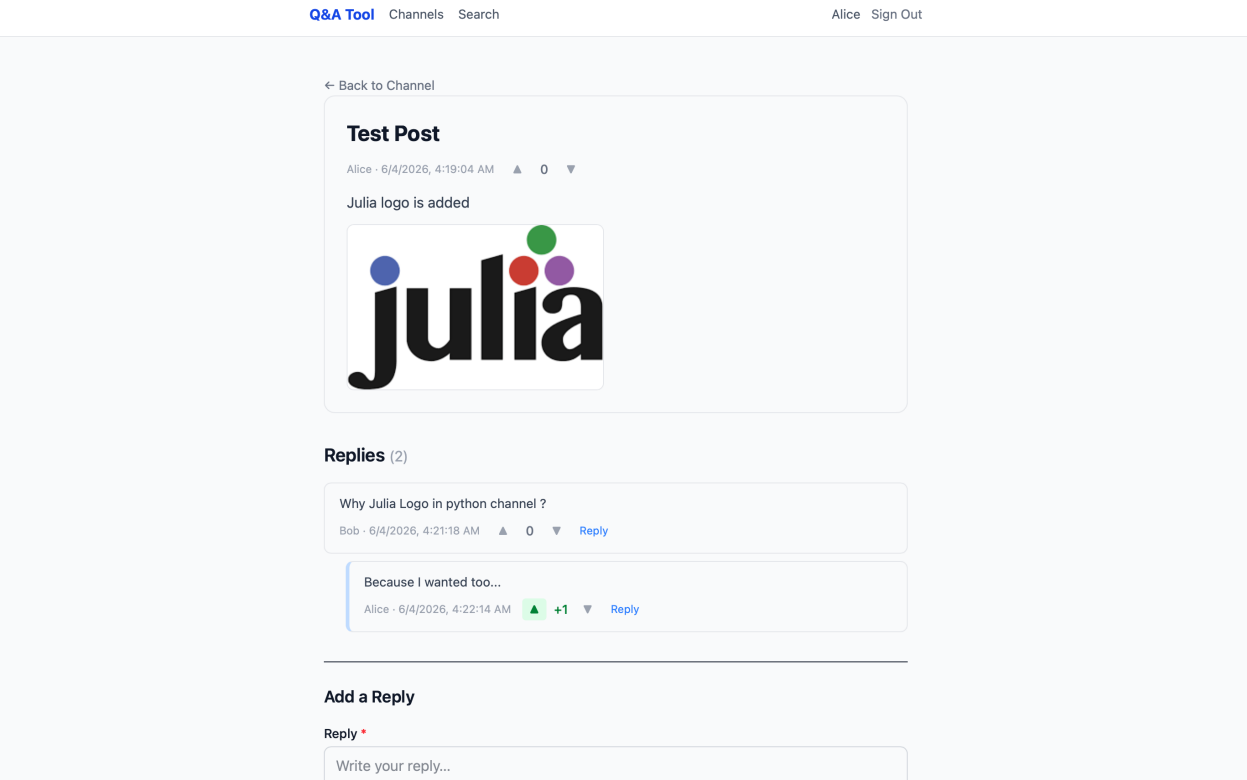


TC-12 — Vote on a post (upvote)

Feature: Part 3 — Voting
Steps: 1. Sign in as `Alice` 2. Navigate to any post 3. Click the ▲ **Up** button on the post

Expected: Vote count updates (net score increases by 1). Button highlights to show active vote.
Result: Pass

Screenshot:

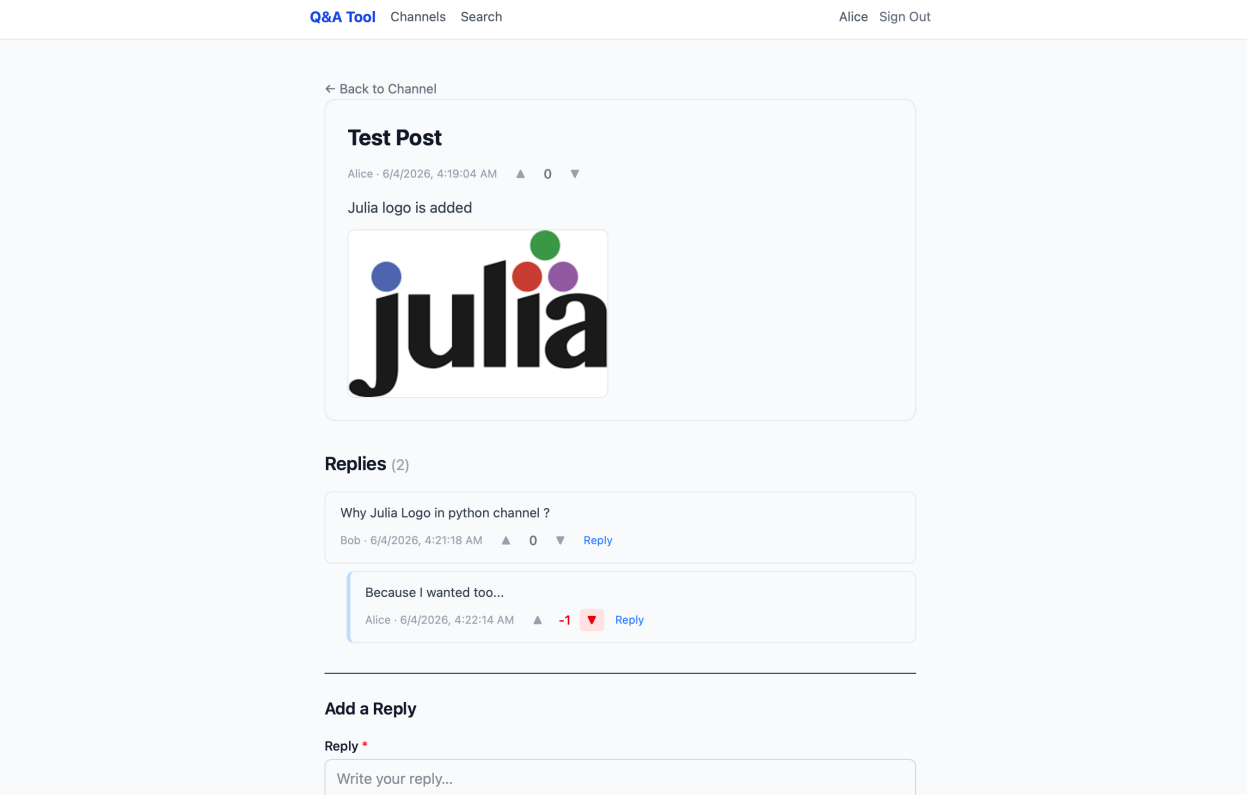


TC-13 — Change vote (up → down)

Feature: Part 3 — Voting rules
Steps: 1. As `Alice` (who just upvoted in TC-12) 2. Click the ▼ **Down** button on the same post

Expected: Score decreases by 2 (removed +1, applied −1). Down button highlights.
Result: Pass

Screenshot:

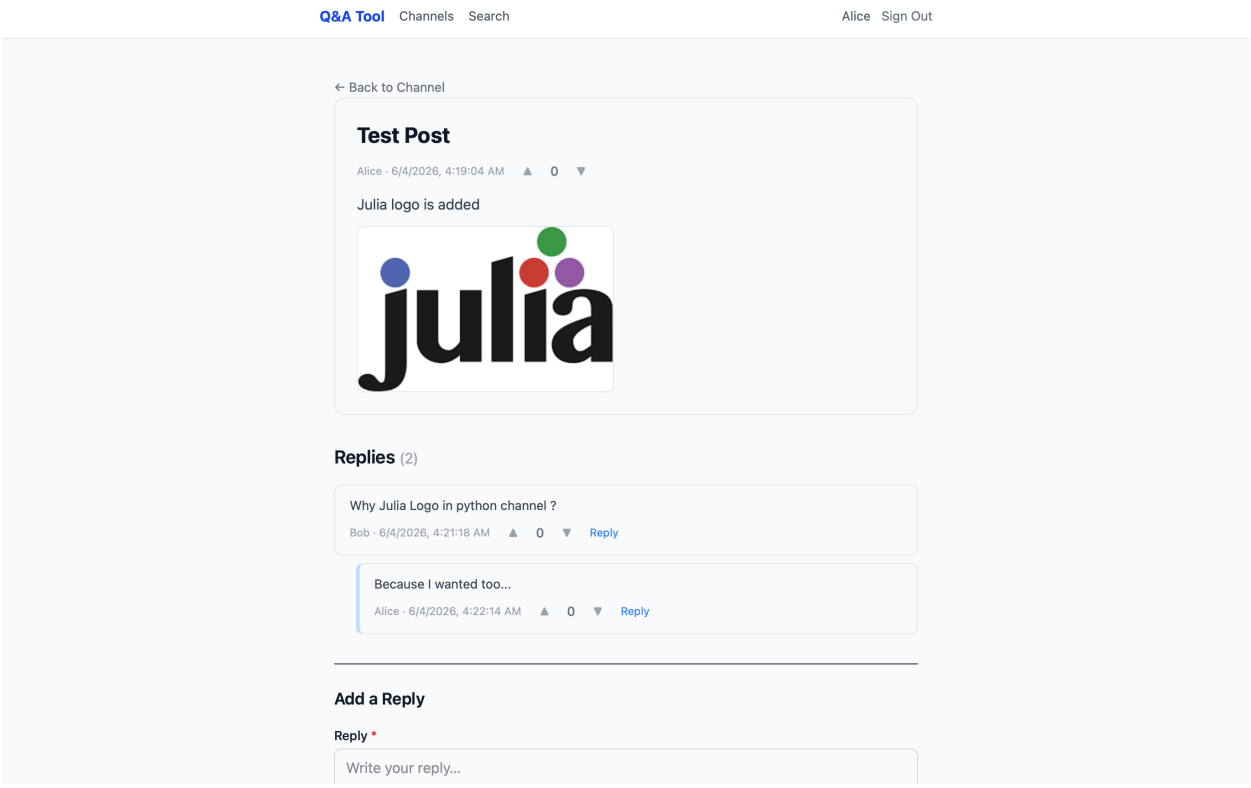


TC-14 — Remove vote (return to neutral)

Feature: Part 3 — Voting rules
Steps: 1. As `Alice` (who downvoted in TC-13) 2. Click the ▼ **Down** button again (same button)

Expected: Vote is removed. Score returns to 0 (or previous). Neither button is highlighted.
Result: Pass

Screenshot:

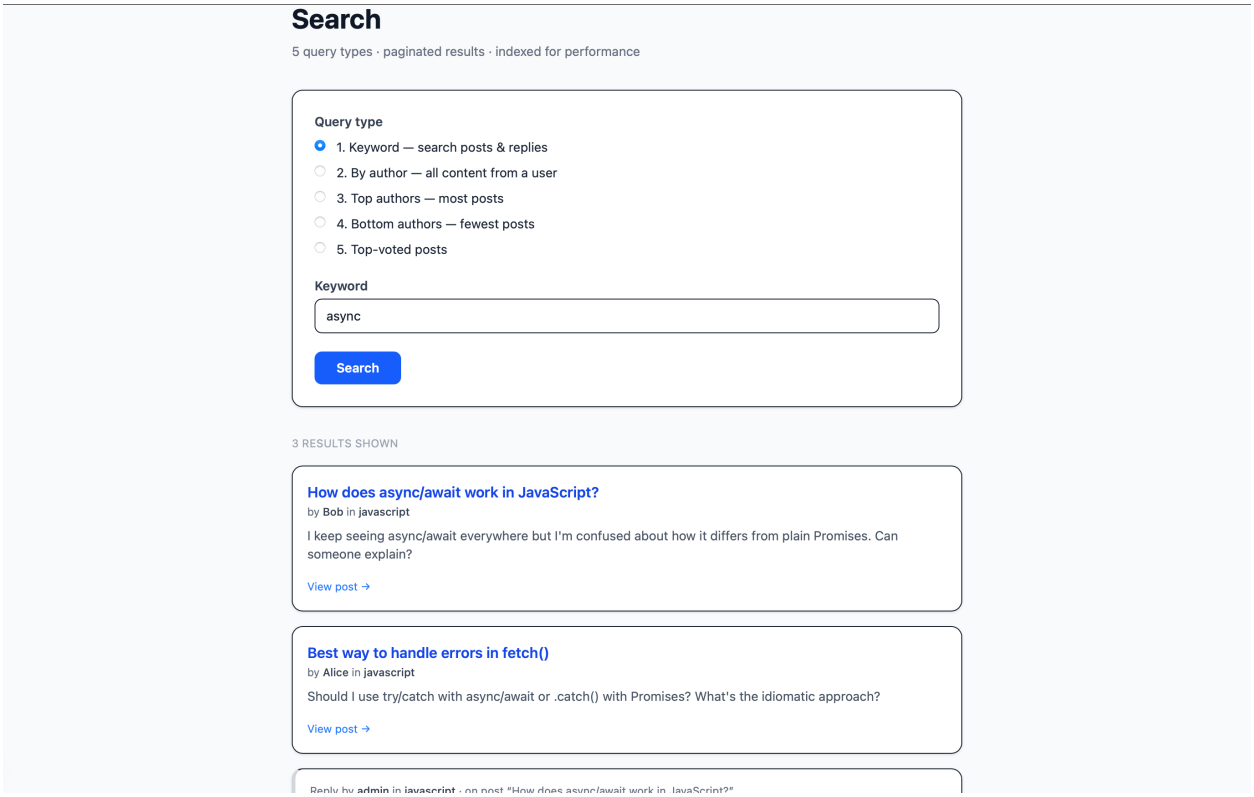


TC-15 — Search: keyword across posts and replies

Feature: Part 4 — Search
Steps: 1. Go to `http://localhost:3000/search` 2. Select **"1. Keyword — search posts & replies"** 3. Enter keyword: `async` 4. Click **Search**

Expected: Results list shows posts and/or replies containing "async". Each result has a "View post →" link.
Result: Pass

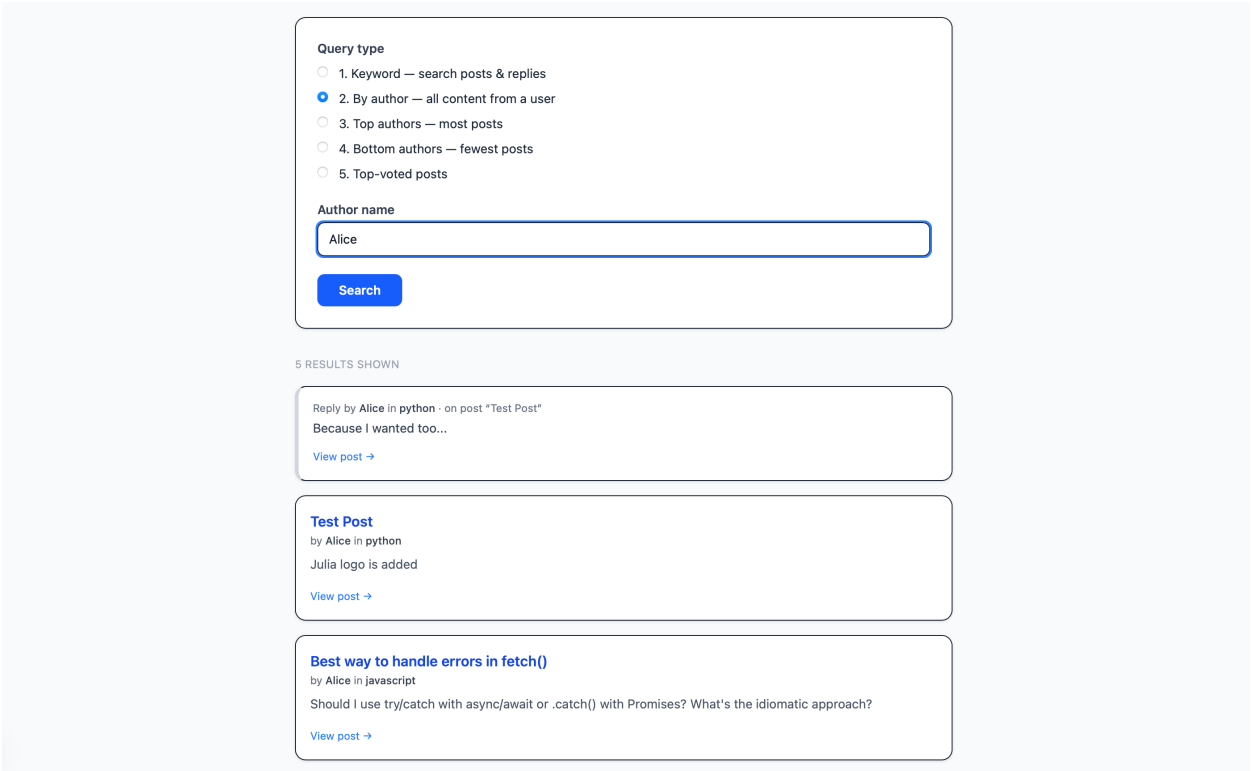
Screenshot:



TC-16 — Search: content by a specific author

Feature: Part 4 — Search
Steps: 1. Go to `http://localhost:3000/search` 2. Select **"2. By author — all content from a user"** 3. Enter author name: `Alice` 4. Click **Search**

Expected: Results show only posts and replies authored by Alice.
Result: Pass
Screenshot:

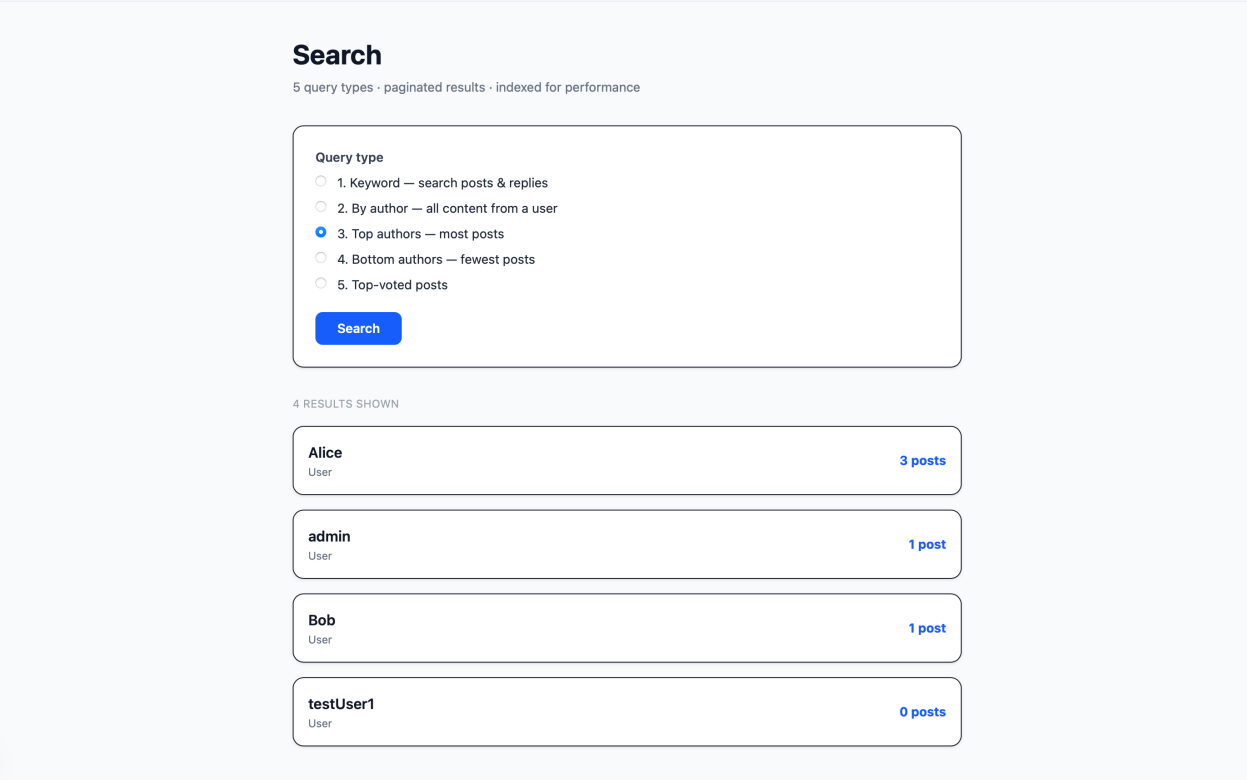


TC-17 — Search: top-voted posts

Feature: Part 4 — Search (ranking)
Steps: 1. Go to `http://localhost:3000/search` 2. Select **"5. Top-voted posts"** 3. Click **Search** (no keyword needed)

Expected: Posts listed in descending order of net score. Score shown on each card (e.g. "+2 pts").
Result: Pass

Screenshot:

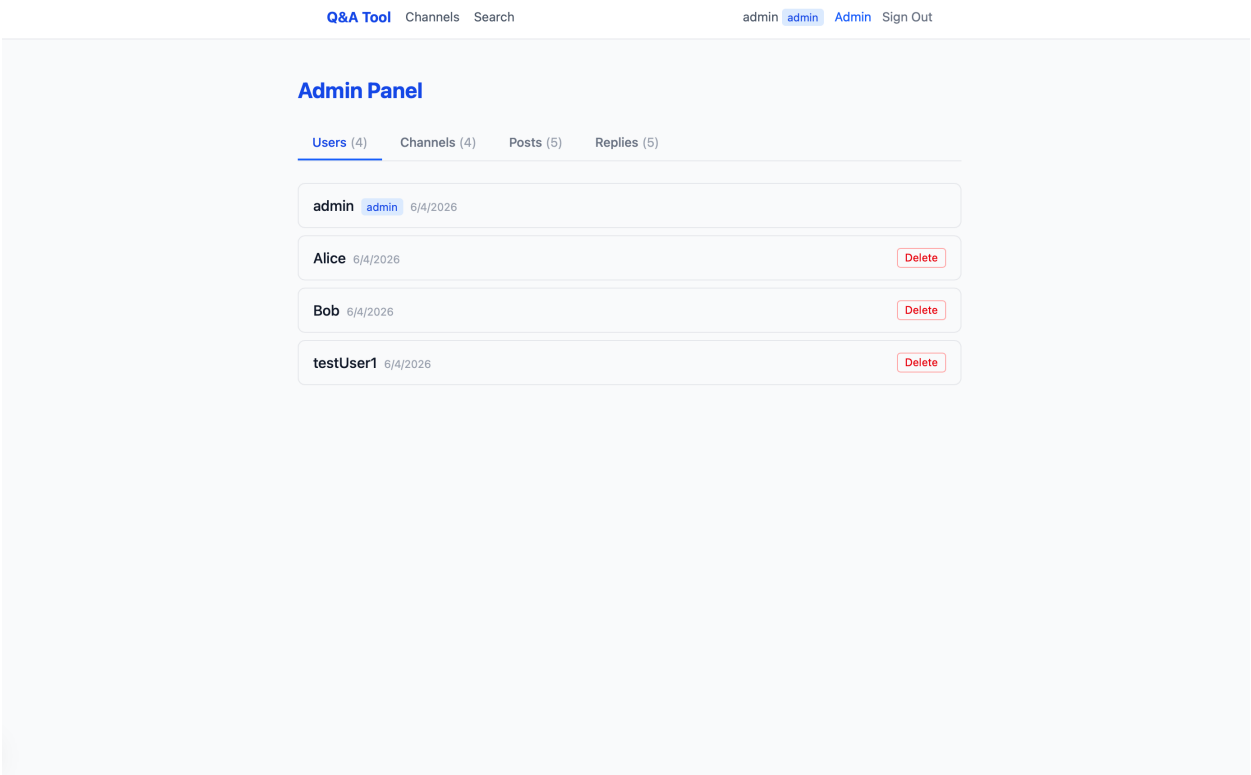


TC-18 — Admin: login and access admin panel

Feature: Part 2 — Admin
Steps: 1. Sign in as `admin` / `admin123` 2. Click **Admin** in the navbar (or go to `http://localhost:3000/admin`)

Expected: Admin panel loads with tabs for Users, Channels, Posts, Replies.
Result: Pass

Screenshot:



TC-19 — Admin: delete a post

Feature: Part 2 — Admin moderation
Steps: 1. Sign in as `admin` 2. Go to `http://localhost:3000/admin` → **Posts** tab 3. Click **Delete** next to any post 4. Confirm the dialog

Expected: Post is removed from the list. Navigating to that post's URL returns an error/not-found state.
Result: Pass

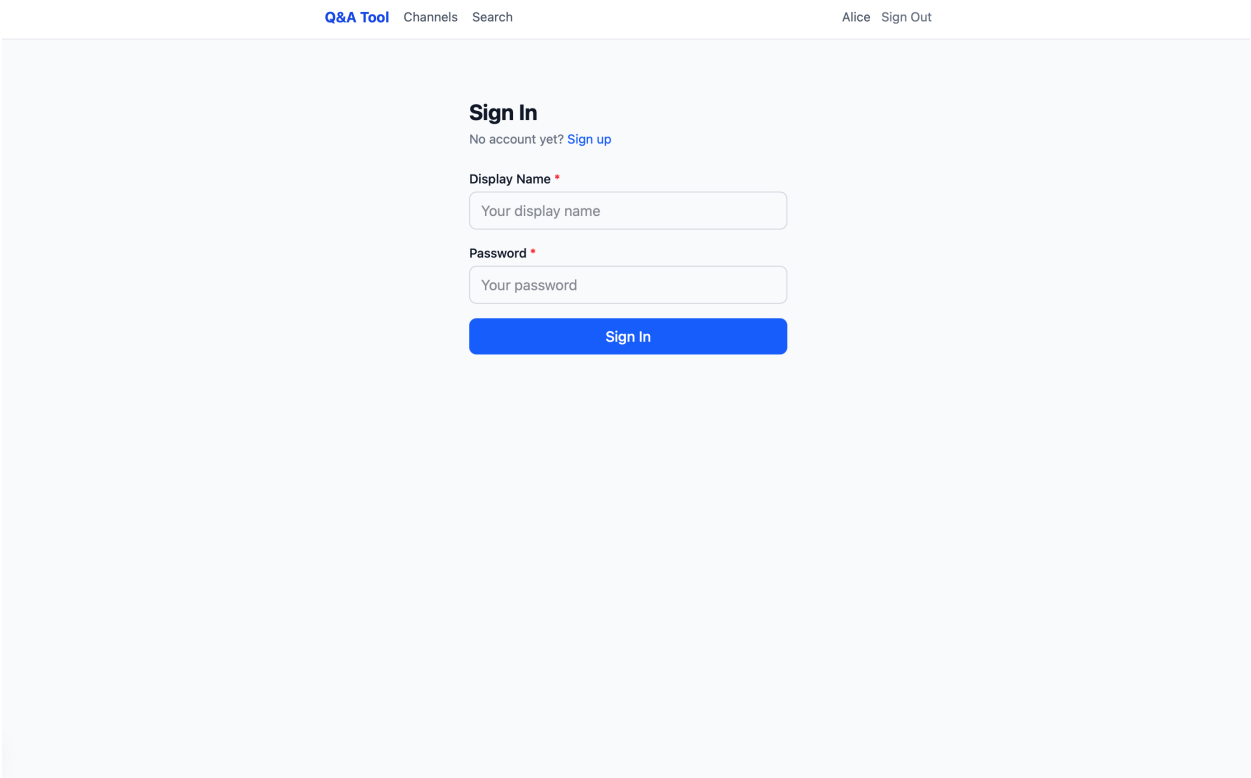
TC-20 — Non-admin cannot access admin panel

Feature: Part 2 — Access control
Steps: 1. Sign in as `Alice` (role = user) 2. Navigate to `http://localhost:3000/admin`

Expected: Redirected to `/login` (middleware blocks the route). No admin panel shown.
Result: Pass
Screenshot:



Summary Table

ID	Test Case	Result
TC-01	Landing page loads	Pass
TC-02	Register new account	Pass
TC-03	Duplicate name rejected	Pass
TC-04	Login — valid credentials	Pass
TC-05	Login — wrong password rejected	Pass
TC-06	Unauthenticated user redirected from new-post	Pass
TC-07	Create channel (authenticated)	Pass
TC-08	Create post with image attachment	Pass
TC-09	Upload non-image file rejected	Pass
TC-10	Reply to a post	Pass

ID	Test Case	Result
TC-11	Nested reply (reply to reply)	Pass
TC-12	Upvote a post	Pass
TC-13	Change vote (up → down)	Pass
TC-14	Remove vote (neutral)	Pass
TC-15	Search: keyword	Pass
TC-16	Search: by author	Pass
TC-17	Search: top-voted	Pass
TC-18	Admin login + panel access	Pass
TC-19	Admin deletes a post	Pass
TC-20	Non-admin blocked from admin panel	Pass

Total: 20 / 20 passed *(update this after testing)*

All tests performed against a fresh Docker build: `docker-compose down -v && docker-compose up --build`
